

Scratch Resistant

3/4" Tapered Flagstick!

Tired of the paint on your \$35-\$75 stick chipping and scratching?

So are we!

So, we don't paint the stick.

We polish it by hand.

To get the taper from 3/4" to 1/2", the stick is run through a grinder. Our competitors then paint the entire stick. It's the paint that chips and scratches.

Our sticks are pultruded in-house with white or yellow resin, ground at each end, then hand-polished back to the pre-ground finish, eliminating the painting, chipping and scratching.

If this isn't enough, our 2015 prices are 20% below Par-Aide and 23% below Standard Golf. It pays to buy direct from the manufacturer.
